1 General Information and Safety Instructions

This guide serves as an aid during start-up and inspection of TPM motor gear units with servo amplifiers. It contains the following points:

- Parameter lists for the TPM series
- Connection schematic for TPM
- Assignment table TPM – Servo amplifier - cable set

Please be sure to carefully read through this document before starting up the TPM and also be sure to read the documentation provided by the manufacturer of the servo amplifier.

WITTENSTEIN motion control will not be held liable for the consequences of the improper, negligent, or incorrect installation or setting of the servo amplifier's operating parameters.

All of the installation, operation, and safety information provided in the servo amplifier documentation is to be observed.

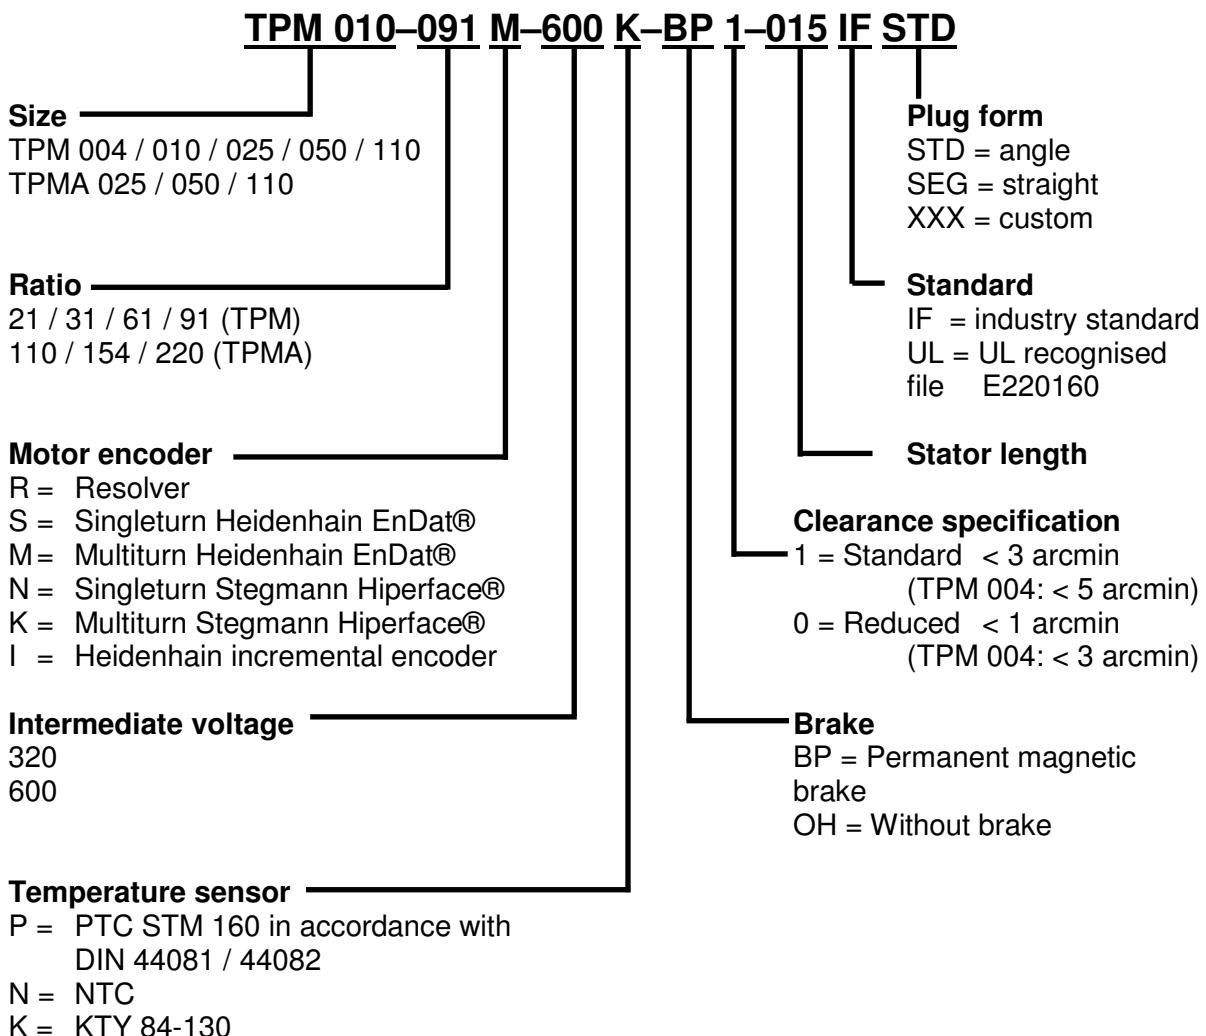

Observe all of the national safety regulations and guidelines of the country where the device is being used. All transportation, installation, start-up, and service work is to be performed by qualified technicians. Qualified technicians are those who are completely familiar with the assembly, installation, and operating procedures, as well as all warnings and safety measures in accordance with the country-specific regulations. Furthermore, they are trained, instructed, and authorised to set the electrical circuits and other devices into operation in accordance with safety regulations.

The drives are intended to be installed in machines being used in commercial applications. You may only operate the equipment if you comply to the national EMC regulations (refer to the servo amplifier documentation for installation information pertaining to EMC) as they are defined for the given application.

Note: All of the product brand names which appear in this Quick Start Guide are trademarks of the relevant companies. If the ® and/or ™ symbols are omitted, this does imply that the name is a free brand name.

2 Name plate data details

The following specifications can be found on the identification plate. Please select the input parameters corresponding to the nameplate values of your drive.

3 Parameter list motor feedback

3.1 TPM(A) with Resolver

The parameter for the motor feedback has to be entered **before** connecting the motor to the drive.
If you enter wrong parameters the encoder or the drive may be damaged.

Parameter	Parameter name	Unit	TPM004	TPM010	TPM025	TPM050	TPM110
03.26	Speed feedback selector			Slot 1, Slot 2 or Slot 3 depending of slot SM-Resolver			
03.40	Drive encoder error detection level		0	0	0	0	0
xx.10	Equivalent lines per revolution		1024	1024	1024	1024	1024
xx.13	Resolver excitation		1 (2:1)	1 (2:1)	1 (2:1)	1 (2:1)	1 (2:1)
xx.15	Resolver poles		2Pole (0)	2Pole (0)	2Pole (0)	2Pole (0)	2Pole (0)
00.43	Encoder phase angle	°	180	180	180	180	180

3.2 TPM(A) with Heidenhain EnDat

The parameter for the motor feedback has to be entered **before** connecting the motor to the drive.
If you enter wrong parameters the encoder or the drive may be damaged.

Parameter	Parameter name	Unit	TPM004	TPM010	TPM025	TPM050	TPM110
03.26	Speed feedback selector			drv (0)			
03.36	Drive encoder supply voltage		5V	5V	5V	5V	5V
03.38	Drive encoder type		SC.EnDat	SC.EnDat	SC.EnDat	SC.EnDat	SC.EnDat
03.41	Drive encoder auto-configuration		EIN (1)				
00.43	Encoder phase angle	°	180	180	180	180	180

3.3 TPM(A) with Stegmann Hiperface

The parameter for the motor feedback has to be entered **before** connecting the motor to the drive.
If you enter wrong parameters the encoder or the drive may be damaged.

Parameter	Parameter name	Unit	TPM004	TPM010	TPM025	TPM050	TPM110
03.26	Speed feedback selector			drv (0)			
03.36	Drive encoder supply voltage		8V	8V	8V	8V	8V
03.38	Drive encoder type		SC.Hiper	SC.Hiper	SC.Hiper	SC.Hiper	SC.Hiper
03.41	Drive encoder auto-configuration		EIN (1)				
00.43	Encoder phase angle	°	120	120	120	120	120

4 Parameter list TPM 600V ratios 21/31

The following table contains all of the parameters that are required for the initial start-up of a TPM motor-gear unit from WITTENSTEIN motion control together with a Unidrive SP. When the TPM and the servo amplifier are properly connected, these parameters guarantee that the TPM can be operated without load with speed control. Based on these default settings, the dynamics of the speed controller can be optimised depending on the application.

Data for combinations not shown here are available on demand.

Parameter	Parameter name	Unit	TPM004	TPM010	TPM025	TPM050	TPM110
00.41	Maximum switching frequency	kHz	16	16	16	16	16
00.42	No. of motor poles		8	8	12	12	12
00.46	Motor rated current	A	0,7	1,1	3,1	5,6	9,7
00.48	Operating mode selector		SERVO	SERVO	SERVO	SERVO	SERVO
01.06	Maximum reference clamp	RPM	7000	7000	6000	5000	4326
05.08	Rated speed	RPM	6000	6450	4838	4650	3300
