

WITTENSTEIN SE

The name WITTENSTEIN enjoys an impeccable reputation as *the* brand for innovation, precision and excellence in the field of cybertronic drive technology – not just in Germany but internationally. Products built by the Igersheim-based high-tech company are found wherever maximum drive, control and positioning precision are required. High-precision planetary gearboxes, mechatronic drive systems and AC servo systems and motors are developed, produced and marketed worldwide by a team of around 2900 employees.

Products made by WITTENSTEIN SE's six Strategic Business Divisions are typically used in robotic systems, machine tools, the packaging industry, conveyance and processing technology and paper and printing presses. Parallel to this, we systematically target niche markets in the aerospace industry, offshore extraction of natural gas and oil and nano technology as well as energy, battery production and the attractions industry.

Technological expertise and innovative vitality are the mainstays of WITTENSTEIN SE's success. The fundamental focus on intelligent mechatronic drive systems and the fusion of micro and macro technologies have driven the advancement of the group's core know-how and competencies step by step. The WITTENSTEIN group inspires enthusiasm for motion control and with its electric gear systems is a partner for efficient electromobility. Our technologies particularly include:

- Transmission technology
- Linear technology
- Innovative gearing technology and machining in general
- Electronics
- Motor technology
- Open and closed-loop control technology
- Sensors and software
- Simulation applications

When it comes to developing, manufacturing and selling components, we set and develop trends in near-real time.

August 2025

WITTENSTEIN SE develops customized products, systems and solutions for highly dynamic motion, maximum-precise positioning and smart networking for mechatronic drive technology.

WITTENSTEIN SE's Strategic Business Divisions

With six strong Strategic Business Divisions, our company presents a single global face to the customer with its claim "WITTENSTEIN – one with the future":

WITTENSTEIN alpha GmbH

Mechanical drive components and complete systems, customized special-purpose gearboxes, complete motor / gearbox units and gearing

WITTENSTEIN motion control GmbH

Customized mechatronic drive systems for extreme environments, aerospace, simulator applications, defense and subsea. Real-time safety software rounds off the portfolio

WITTENSTEIN cyber motor GmbH

Highly dynamic servo motors and drive electronics, complete mechatronic drive systems

WITTENSTEIN galaxie GmbH

Innovative premium products for even the highest precision requirements

attocube systems GmbH

Highly precise nanopositioning devices and measurement technology for industrial applications

baramundi software GmbH

Digital networking within the WITTENSTEIN group is driven by baramundi software GmbH, a wholly owned subsidiary which develops secure and efficient solutions for Industry 4.0

With around 25 sites in more than 45 countries, WITTENSTEIN is an internationally active one-stop shop for mechatronic drive technology. We are represented in all major technology and sales markets.

WITTENSTEIN SE worldwide: Key performance indicators as at March 31, 2025

- Turnover 2024/25: 526 million euros
- Turnover 2023/24: 498 million euros
- Turnover 2022/23: 519 million euros
- Turnover 2021/22: 461 million euros
- 2853 employees worldwide
- Companies: 25 sites in more than 45 countries worldwide
- Trainee ratio: 7 %
- Management Board: Dr Bertram Hoffmann (CEO), Dr Benedikt Hofmann, Erik Roßmeißl, Christian Zeidlhack
- Chairman of the Supervisory Board: Professor Michael Junker
